

# Build It PostFix

## Technical Data Sheet

### PRODUCT OVERVIEW

Build It PostFix is a specially designed fast setting concrete, ideally suited to erecting all types of posts. Simple and convenient to use, the pre-blended material is widely used in various building and repair applications such as fence posts, anchoring poles or signs, repairing cracks or potholes in concrete surfaces and creating small concrete structures.

### Product Application

- PostFix is a factory-made blend that consists of cement, aggregates, sands, and specially formulated additives.
- The product is a no-mix concrete - mixing can alter the set time and overall performance of the product.**
- Standard concrete working practices should be adhered to.
- Temperature range 5 degrees- 25 degrees.
- Protect from frost and extreme heat.

### Product Usage

- Position Post in Hole.
- Fill the hole with water using the guide on the back of the bag.
- Empty the complete bag/bags into hole around post.
- Check the position of the post and adjust as necessary.
- Quickly tamp to remove any air bubbles - 15 seconds maximum.
- Only if needed, add a small amount of water to activate any remaining powder left on the surface.

### Product Features

- Available in 20kg water resistant plastic bags
- Rapid setting of only 5 - 10 minutes
- Quick and easy to use, just add water

### Typical Results

PostFix will start to set between 5 to 10 minutes and will typically give a strength of more than 20N/mm<sup>2</sup> after 28 days.

### Storage Conditions

PostFix is supplied in a waterproof sealed bag and should be stored unopened until used. Always keep off the ground on a pallet. The material has a 12 month shelf life if stored correctly.

### Health, Safety & Quality

All Health & Safety guidance and advice can be accessed through the Material Safety Data Sheet (MSDS). Visit [tcaggregates.co.uk](http://tcaggregates.co.uk) for more information.
